For example: if the modified duration is 2 then 1% change in market interest rate will change the value of portfolio by 2% i.e. 2 times the change in interest rate. The value of fixed income portfolio increases when the interest rates falls and vice versa. **BETA** is a number that indicates the extent to which value of the portfolio will change with respect to change in value of its benchmark. The benchmark has a beta of 1. Change in value of a portfolio which has a beta more than 1 will be more than the change in value of the benchmark, where the beta is less than 1 the change will be less than the change in benchmark.
